Updated Machines Serial Number:	n/a

Kyocera Net Viewer v6.0.1428

Type	File name	Version	Remarks
Utility	6.0.1428.Main.27langs.Install	6.0.1428	KYOCERA Net Viewer

Details of Changes

No	Item	Content
1	New Model support	Support for new models
2	Corrective measures for the firmware upgrade failure	"Invalid digital signature" might be displayed during the remote firmware upgrade in sleep mode.
3	Eliminate OS support	The Following are eliminated from the operation guide and ReadMe as supported OS. Windows 7 Windows Server 2008 Windows Server 2008 R2
4	New branding support	Following are changed for the new branding support. ・ Change icons ・ Change color scheme ・ Change fonts
5	Enable changing the mail sender address	Use of either the address set by the device or the login user information can now be switched since the SMTP authentication might fail when sending mail. (The main unit firmware also needs to support it.)
